LOGISTICK, INC

Innovators of Freight Securement Systems®

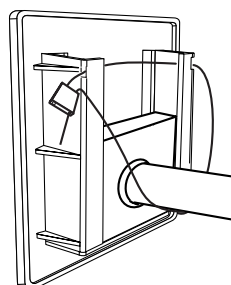

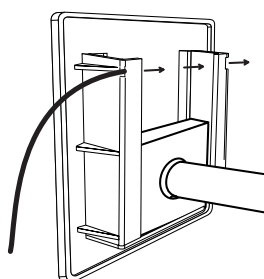

The complete **INSTALLATION** guide for tamper evident **Security Seals** for use with **Logistick Logipad, Wedge XL or Wedge International**.

For best results, please read through all instructions prior to installation.

- 1 Locate Tamper Evident Slot:** The slots are found on the Logipad, Wedge XL and Wedge International on the upper part of the pocket. Refer to the Logipad picture below for the general area of slots.

- 2 Installing Security Seals:** Locate the holes on the upper section of the Logipad. Run the loose seal wire through both holes and underneath the load lock or 4x4 forming a complete loop, meeting at the body of the seal. Pull loose wire through the body of the seal until it is tight and secure. Caution, once the wire has passed through the body of the seal, it's locked in place. Contact a Logistick representative for more details.
